Degrees

Havo at Elde College Schijndel

The Dutch equivalent of high school diplomas in the case you are not familiar with this please have a look at this link: https://en.wikipedia.org/wiki/Education_in_the_Netherlands

Tutoring certificate at Avans University of Applied Sciences

Past year I took a workshop in tutoring and how to give good feedback to your fellow students. In this extra course I earned a certificate.

Languages

Dutch: My mother language where I have been born and raised with.

English: Second language which I have spent many hours trying to master. Besides minor flaws I speak English fluently.

German: Small understanding of German and speak it just enough to make myself clear.

- Responsible for cooling section
- Led small team

Personal Interest

Who am I?

I am Max Beekmans a 20 year old student born and raised in the Netherlands. I have been fascinated with tech from an early age which is what brought me to my current collage; The Avans University of Applied Sciences where I am a fulltime Computer Science student. Here I spend my days programming and managing projects. However, I am completely in my comfort zone when I can focus on my task.

Because of the innovation that the United States brought to Europe I have always felt drawn there. This is why my great ambition is to live and work in the United States. It is here where I can perform the skill I have acquired over the years and am improving still. Therefore my ultimate goal is to be part of the development of a product and see happy customers using this.

Interest and ambitions

I am a huge audiophile who loves to play guitar and collect records. In my spare time you can either find me programming while listening to these records or playing videogames. In the future I'd love to combine my interests for videogames or music with my work. However, this is not my only ambition. Developing an Android app is also still on my list. Ever since my visit to the Big Android BBQ Amsterdam I have been getting more and more into Android development.
